Dynamics of factory production at Southern Urals in the last quarter of 18th — early 19th centuries (illustrated Kyshtym and Kasli factories)79

The author tries to reveal dynamics of change of manufacture statistics, to define the factors influencing the change of such dynamics, to study the work of factory attendants and salesmen, aimed at organisation and realisation of manufacture at Kaslinsky and Kyshtymsky factories in the last quarter of 18th — the beginning of 19th centuries. Particular attention is given to the problems of interaction between salesmen and the plant owner as a major factor defining change of dynamics of factory manufacture. The following factors are singled out: change of personnel of the main participants of administrative manufacturing process (salesmen, workmen and factory owners), their relationships,

manufacturing expenses. It should be noted that in general the dynamics of manufacture, despite lack of steadiness and frequent drops, nevertheless was positive (at least, till the end of the century) and the drops were often caused by not recession of the manufacture, but by careless reports sent to the factory owner.

K e y w o r d s: dynamics of manufacture, manufacture factors, social relations, the case of salesmen, factory reports.

Land privatization in the Vyatka and Perm provinces in 1906—1917125

The article deals with the appropriateness the procedure of land privatization by the Urals peasants and operation of government agencies for its implementation. It was revealed that the land privatization led to out-migration the large part of population, the appearance the land-poor communities and the development of commercial agriculture.

It was determined that the continued ability of extensive farming in terms of prevailing trends in the relative social homogeneity of most residents of the Urals village had reduced reformist impulse. Number of people willing to become owners of the personal land in every county depended not only on their personal preferences, but also on the way of life in a particular area (the features of land tenure and land use, the development of commodity sectors of agriculture, national composition, population density, and the nature and level of "waste" on earnings, resettlement, attitude of "peace" to the allotment and so on). In total, significant role in privatization process was played by District Commanders.

K e y w o r d s: land privatization, Stolypin's agrarian reform, Vyatka province, Perm province.

**The official propaganda role of enemy image construction in mass
consciousness in Russia during World War I170**

The article is devoted to the problem of efficiency of the official Russian propaganda aimed to enemy image construction during World War I. It concerns the weakness of anti-German propaganda in Russia from a conceptual perspective. One of the main mistakes of the Russian establishment was the lack of mass consciousness preparation for the war. Then, significant efforts were focused on campaigns not against the Germans as direct enemies, but against the English, who didn't satisfy expectations as allies. Third problem is the dominance of a grotesque, humorous image of the enemies instead of more effective policy to picture the enemies as barbarians and monsters.

K e y w o r d s: propaganda, World War I, mass consciousness, enemy image

SECTION 3. PROBLEMS OF METHODOLOGY, HISTORIOGRAPHY AND SOURCE STUDIES

Tomas-Prozorova Victoria Borisovna
